Glattfelders in Art

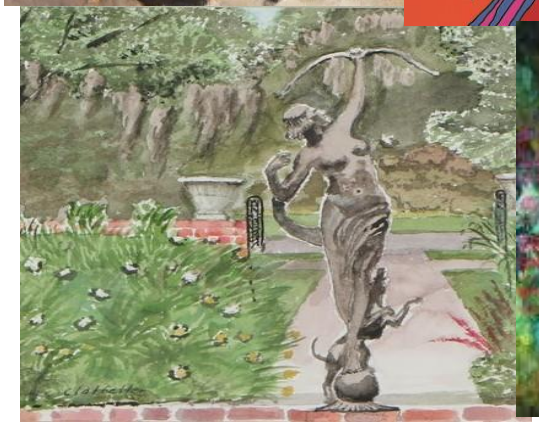

by Harry F. Gladfelter

Glattfelders in Art

- "Glattfelders in Art" is about artists who are decedents of Casper Glattfelder and his brother Johann Peter, who immigrated from Switzerland to the colonies in 1743.
- Also included are the spouses of those decedents.
- Most of the information here is a collection of what was found on the internet, although every attempt was made to contact the artists included.
- Thus, much of what is written was conveyed to me by the artists themselves.
- It is with warm feelings that I got to know and learn from these wonderful artists.

Glattfelders in Art

- The first artists featured are those who are still living and still practicing their skills as an artist.
- Most are professional artists who have degrees in art, and either have studios or work in the profession.
- A few are considered amateurs, with little training, however, their art is quite good from their natural talent.
- The second group are "Legacy" artists that are no longer with us. Their artistic works can still be found, as are their life stories, on the web.

- In addition, she has an AA in 3D animation from the Art Institutes of Atlanta.
- In 1998, she moved her art into the digital world and decided to turn her passion for art into a career. Thus, myartplane.com.

Cathy Clodfelter

- As all artist, she loves to create, making pottery, painting murals, portraits, and anything else that sits still too long.
- But myartplane.com is not only about art. She also uses her passion for data to help small businesses design ads, and do all the things necessary to expand their online sales.
- An example: she helped a small RV parts company to grow sales exponentially to $8,000,000 in three years.
